CATALINA VRINCEANU

Junior Full Stack Developer

PROFILE

I am a web development bachelor's student with a strong interest in building structured, user-friendly, and functional web applications. I enjoy working across both front-end and back-end development, focusing on visually appealing and maintainable solutions.

I am comfortable working both independently and in collaborative team environments, where I value clear communication and responsibility. I approach development with a problem-solving mindset and take initiative when facing challenges, aiming to understand both the technical and practical aspects of my work.

Driven by curiosity and continuous learning, I actively seek opportunities to improve my skills. I am currently seeking an internship or junior-level position within front-end, back-end, or software development, where I can contribute to real-world projects and grow as a professional developer.
